7.0 List of existing program and proposed program

Appendix 1 – Justification of Revisions to the Neuroscience Minor

The current Neuroscience Minor was established before the Neuroscience Major came into existence (August 2008) and therefore does not include a key new introductory course, NSCI 200 (Introduction to Neuroscience 1) as well as many other relevant courses that are part of the Major. Moreover, the current Neuroscience Minor requires 12 credits that 400- and 500-level, considerably more than the norm for other Minor programs in the biological and biomedical life sciences (see Appendix 2 - Comparison of BBL Minors).

The proposed Minor, designed on the basis of the Neuroscience Major, eliminates these deficiencies. It requires students to take NSCI 200 and 6 advanced level credits rather than 12. It also broadens the choice of courses in the different areas of neuroscience.

Another feature of the proposed Minor is that the 6 Complementary credits at the advanced level must be from outside the student's "home" department. This will ensure that students get exposed to advanced neuroscience courses given by departments other than their own, thereby providing them a broader perspective of the field.

Some courses in the current Minor have been deleted from the proposed Minor for one of two reasons: either they are in the Neuroscience Major (ANAT 322, PHAR 300, 301, 562, PSYT 301) or the registration pressure on the course is too great (ANAT 321). On the other hand, a total of 19 courses that are part of the Neuroscience Major have been added to the revised Minor.

Finally, the revised program will be listed as being offered by the Faculty of Science. Indeed, since 2008, all student advising for the Minor has been done by Science's Multidisciplinary Program Adviser.

Overall, the proposed Neuroscience Minor will be distinct and flexible, giving students the opportunity to obtain a good understanding of the field.

Minor

Department*	Core required	Complementary	Total	Minimum credits at 400/500 level	Lab courses
BIOL	15	10	25	0	optional
BIOT	15	9	24	3	no
NSCI current	0	24	24	12	optional
NSCI proposed	13	12	25	6	optional
PHAR	12	12	24	9	optional
PSYC	0	24	24	0	optional

U1=20

U2=13

U3=9

Attachment 1B – continuation of Section 8.0

The Neuroscience Curriculum Committee unanimously approved the revisions to the Neuroscience Major. The committee members are:

Monroe Cohen
Joseph Dent
Julio Martinez-Trujillo
Gillian O'Driscoll
Gerald Pollock
Edward Ruthazer

The Chairs of the Departments of Biology, Physiology, and Psychology – the 3 coordinating departments of the BSc Neuroscience program – each approved the revisions. Their approvals are attached.

Each of the Coordinators of the following 19 courses approved addition of their course to the program. Their approvals are attached.

BIOC 212
BIOL 200
BIOL 201
BIOL 202
BIOL 300
CHEM 212
LING 390
NSCI 200
PHGY 314
PHGY 425
PHGY 524
PSYC 315
PSYC 317
PSYC 342
PSYC 444
PSYC 501
PSYC 506
PSYC 532
PSYT 505

The Department of Neurology and Neurosurgery, which is listed as offering the current Minor in Neuroscience, agreed that the revised Minor should be offered by the Faculty of Science. The approval is attached.

Subject: RE: Proposed Revision of the Neuroscience MINOR

Hi All,

I consulted Ellis Cooper regarding the Minor program. He thought that the proposed changes would make the minor program less challenging, but otherwise had no other major concerns. I am okay with the proposed changes. Overall, the Department supports the recommended changes.

Best,
John

Subject: Proposed Revision of the Neuroscience MINOR

Dear Chairs of Biology, Physiology, and Psychology,

Our Neuroscience Committee, which includes representatives from each of your Departments, has unanimously agreed on extensive revisions to the Neuroscience MINOR. The coordinators of all newly-added courses to the revised program have also granted their approval. I now seek your approval.

Attached is the proposed revised Minor (01) with the changes highlighted in yellow. Also attached is the justification for the proposed changes (02) and a comparison with other Minors in the Biological and Biomedical Life Sciences (03).

For the 2010-11 academic year there were 20 U1 students, 13 U2 students, and 9 U3 students registered in the Neuroscience Minor. So the impact on enrollment in the newly-added Complementary courses should be relatively small. The largest increase in enrollment (about 20) will occur in NSCI 200, a newly-added Required Course, because this foundational neuroscience course is not part of the current Minor (or any of the Major programs except for the Neuroscience Major). By contrast, the increase in enrollment in the 2 other newly-added Required Courses will be much less, because most of the students in the Neuroscience Minor require those courses for their Major. For example, 17 of the 20 U1 students who were registered in the Minor last year required BIOL 200 for their Major. So, based on last year's numbers, the revised Minor would increase enrollment in BIOL 200 by only 3 students. And, for

Subject: Incorporation of PSYC 444 in the Neuroscience Minor
Dear Maria,

The Neuroscience Committee which oversees the Undergraduate BSc Neuroscience Program has unanimously agreed on extensive changes to the Neuroscience Minor and would like to include your course, PSYC 444, in the revised version.

Attached is the proposed revised Minor (01) with your course highlighted in yellow. Also attached is the justification for the proposed changes (02) and a comparison with other Minors in the Biological and Biomedical Life Sciences (03). As of Winter 2011 there were 20 U1, 13 U2, and 9 U3 students registered in the Minor.

To comply with the required formalities, please respond by email indicating whether or not you approve incorporation of your course in the proposed Neuroscience Minor. For approval, simply write "I approve" in your reply.

Thanking you in advance,
Monroe
